Microzine® *A Computer Learning Library on a Disk*™

On this disk:

2088: An Oval Office Odyssey

The year is 2088, and you are the youngest President in the history of the United States. What are the chances of your winning re-election? It depends on how you solve some difficult problems facing the country. Should the World Series be played on Mars? Should dolphins be forced to go to school? All the decisions are yours.

Keyboarding

Master the skill of typing quickly and accurately with this simple and fun tutorial. Learn correct fingering and the location of all the keys. Then practice what you've learned by playing a fun game with Digit the robot.

Roundup

Round up wild horses by drawing two circular lassos on the screen. You'll earn one point for each horse you round up and lose one point for each cactus you round up. It may sound simple, but this challenging program will push your logic and strategy skills to the limit.

Estimator

What is the temperature on the thermometer? How many seconds have ticked off the clock? Estimate the answer! Each game has 12 rounds, and you can play with up to three other players.

Learning Opportunities: Reading for detail and comprehension, math, social studies, decision-making, strategy and problem-solving, typing/keyboarding, computer literacy.

Contents: 1 two-sided disk, 1 handbook, 1 questionnaire
